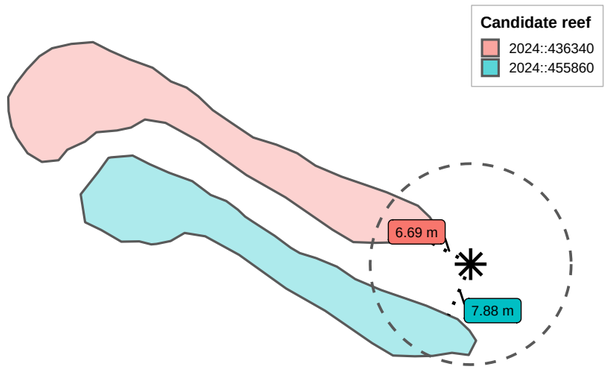
Spatial Match Review — Page 1

Previous UID values are from December 04, 2024.

LocationID 349623

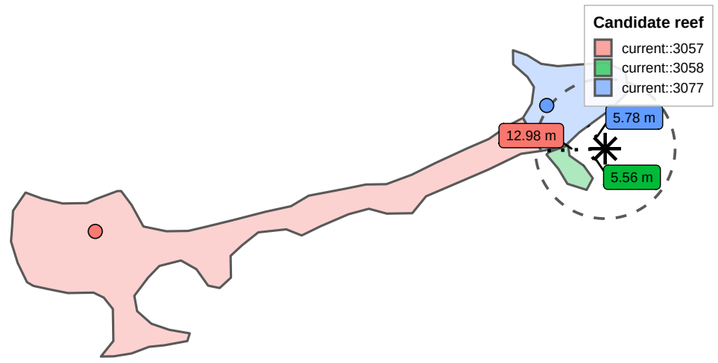
ProgramID: 4012
Previous UID: 34842 | New UID: 35366



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 2215

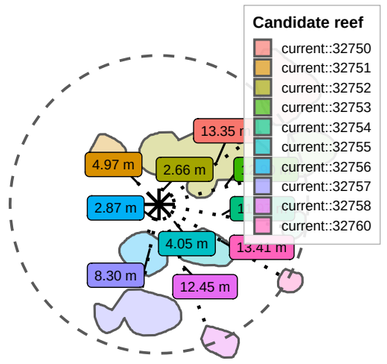
ProgramID: 972
Previous UID: 34823 | New UID: 35365



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 864475

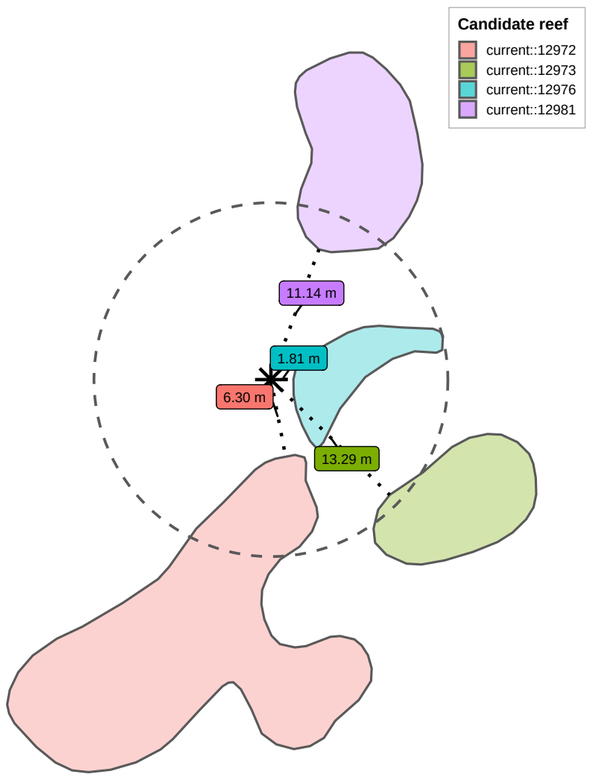
ProgramID: 5017
Previous UID: 4747 | New UID: 35369



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 864492

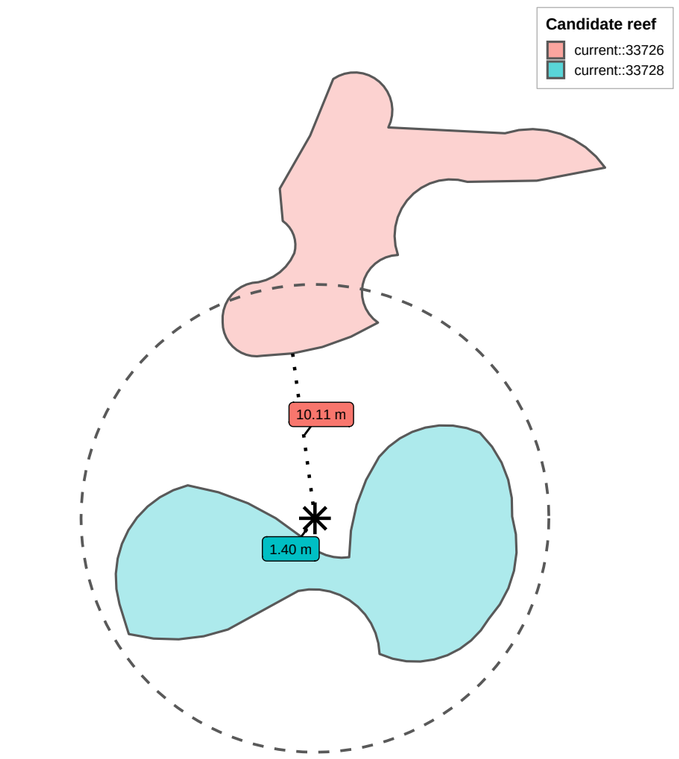
ProgramID: 5017
Previous UID: 34857 | New UID: 35370



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 864502

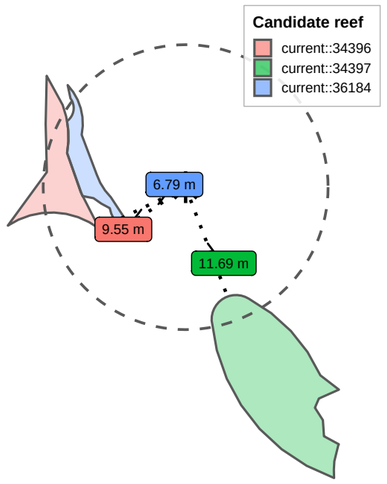
ProgramID: 5017
Previous UID: 34863 | New UID: 35371



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 864503

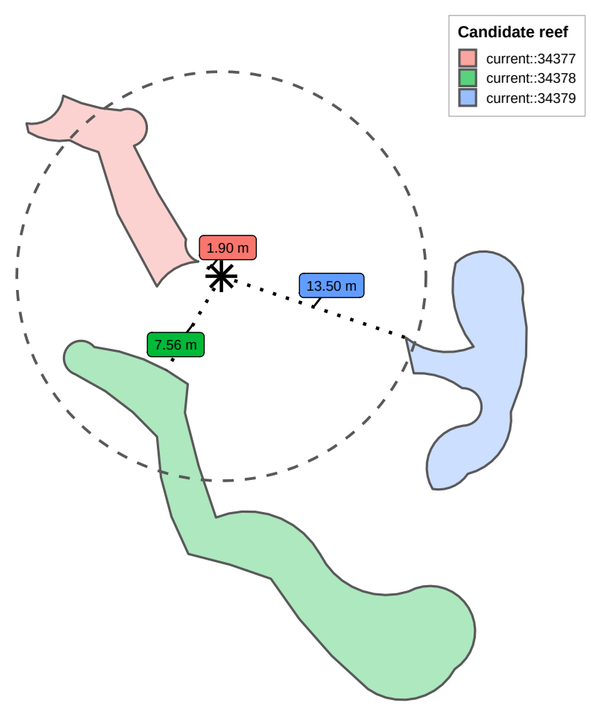
ProgramID: 5017
Previous UID: 5832 | New UID: 35372



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 864517

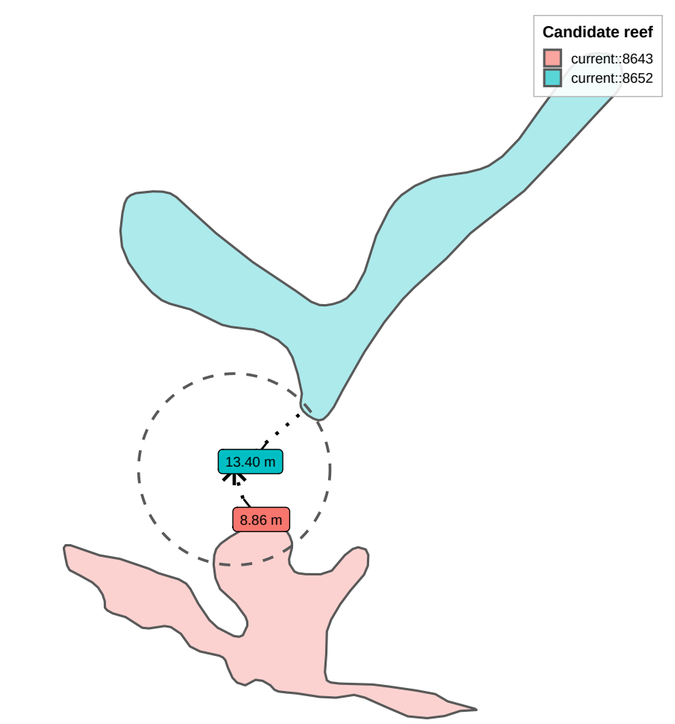
ProgramID: 5017
Previous UID: 7587 | New UID: 35373



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 864557

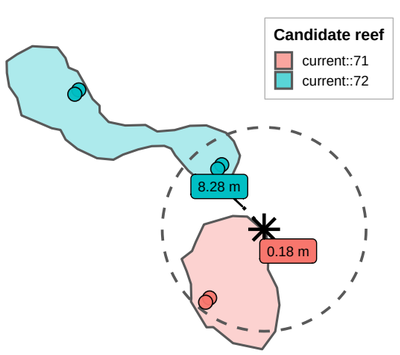
ProgramID: 5017
Previous UID: 34898 | New UID: 35374



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 864659

ProgramID: 4014
Previous UID: 5588 | New UID: 35375



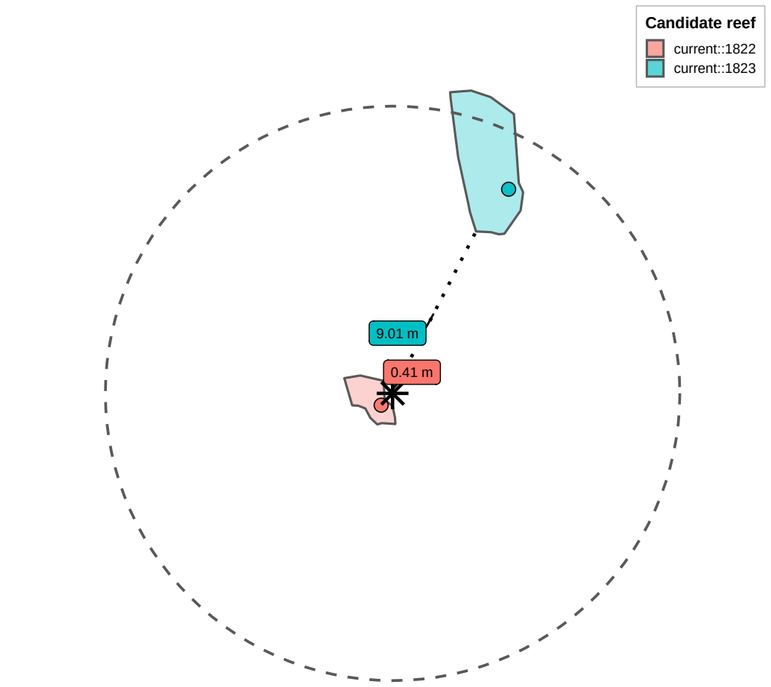
Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

Spatial Match Review — Page 2

Previous UID values are from December 04, 2024.

LocationID 864857

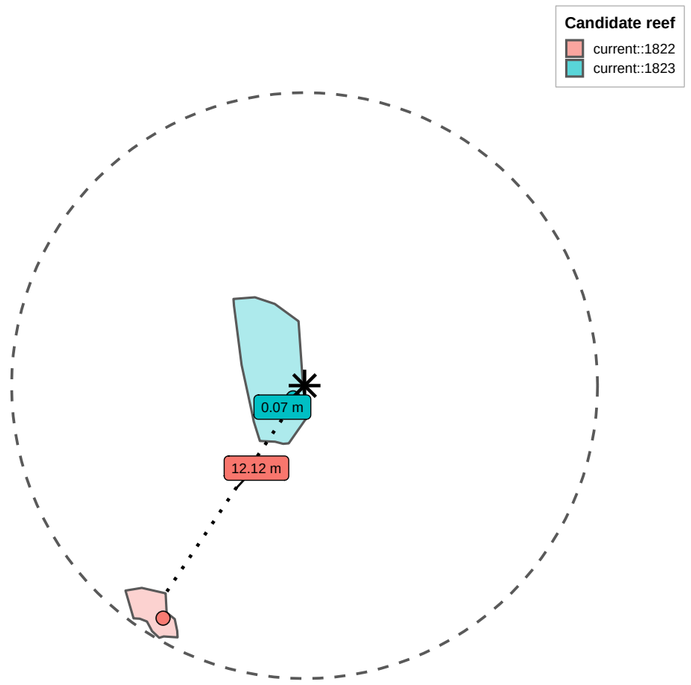
ProgramID: 4014
Previous UID: 5620 | New UID: 35376



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 864858

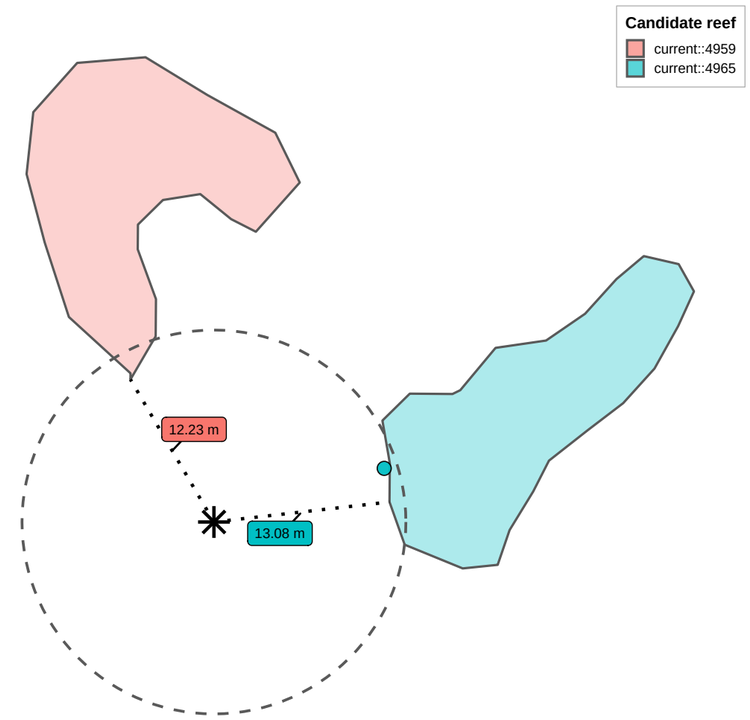
ProgramID: 4014
Previous UID: 5621 | New UID: 35376



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 919862

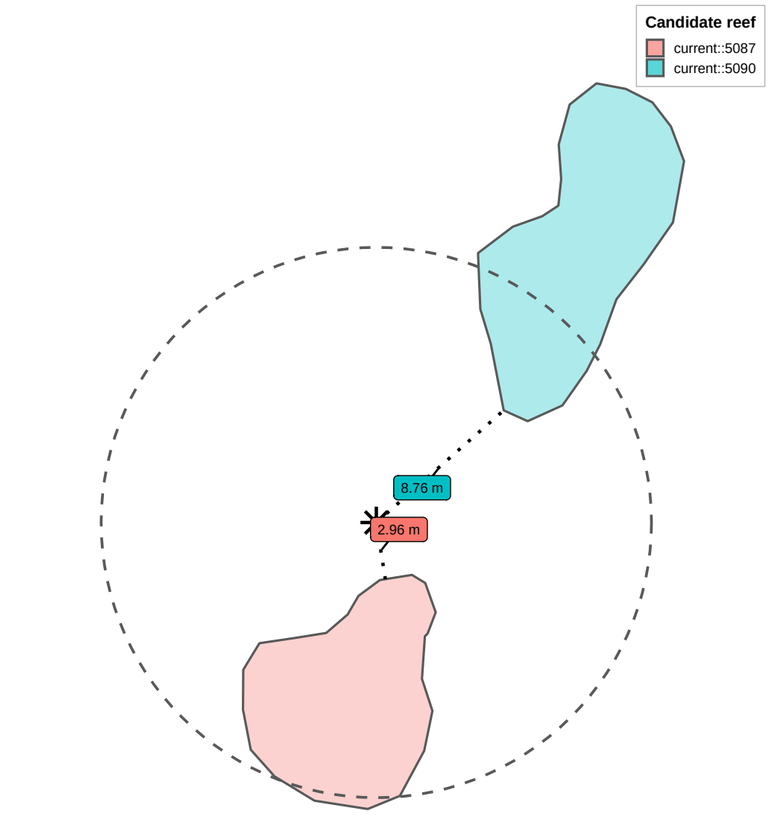
ProgramID: 5010
Previous UID: 20943 | New UID: 35377



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 935453

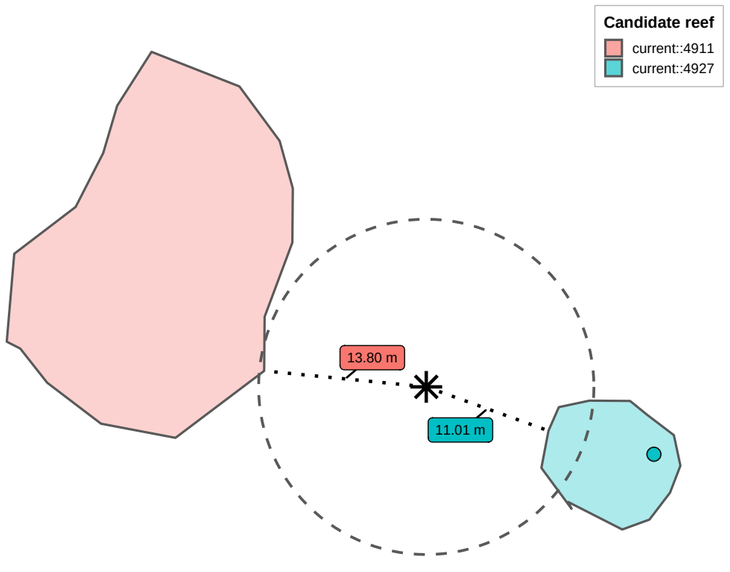
ProgramID: 5063
Previous UID: 21065 | New UID: 35385



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 935465

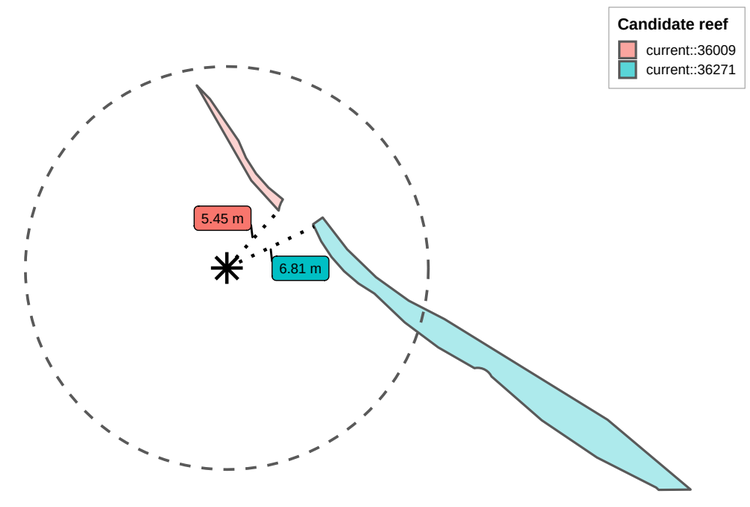
ProgramID: 5063
Previous UID: 20905 | New UID: 35388



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 935708

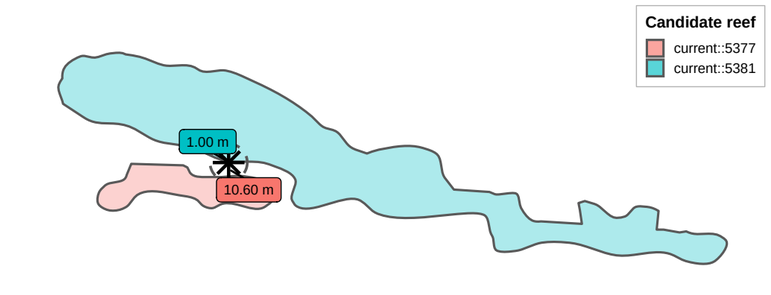
ProgramID: 5017
Previous UID: 35067 | New UID: 35389



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 1257254

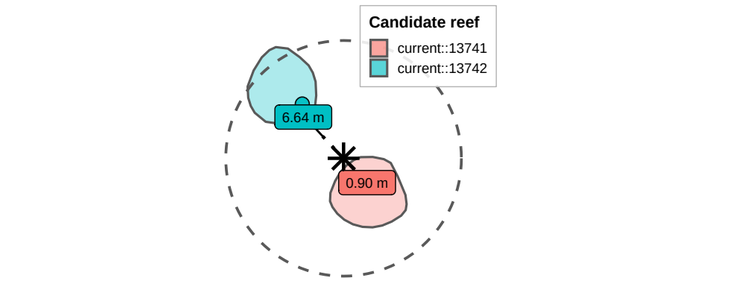
ProgramID: 4044
Previous UID: 35249 | New UID: 35361



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 1303235

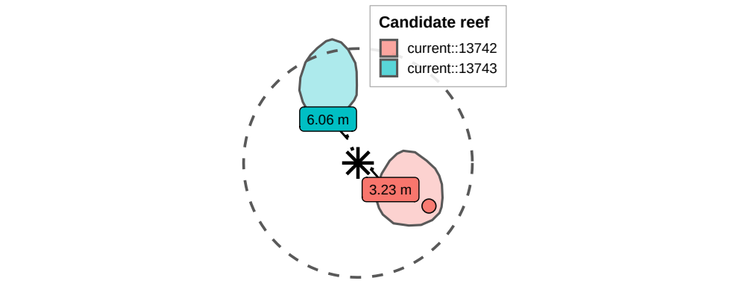
ProgramID: 4000
Previous UID: 9033 | New UID: 35362



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.

LocationID 1303237

ProgramID: 4000
Previous UID: 9032 | New UID: 35363



Dashed outline = 14.21 m search buffer; dotted lines show point−to−reef distance.
Colored circles = locations associated with one candidate reef.
White diamonds = locations associated with multiple candidates.
